CustomVue™
INDIVIDUALIZED LASER VISION CORRECTION

**PERSONAL
BEST
VISION**

Associated Ophthalmologists, PC **ANNOUNCES GIANT LEAP IN LASER VISION CORRECTION**

You've been hearing about laser vision correction for years; about the boost in confidence that comes with the freedom from glasses and contact lenses, about the carefree, active lifestyle. You probably have friends or family who've had laser vision correction. You may have talked to your doctor about it or done some research. But you're still dealing with those glasses and contact lenses. Why?

Waiting for a major advancement in laser vision correction? Well, it's here.

"At Associated Ophthalmologists, CustomVue™ has become the cornerstone of our practice. It's taking laser vision correction to a new level," says Dr. Husain.

The FDA has approved VISX CustomVue, establishing a new standard in laser vision correction. FDA clinical studies demonstrate that CustomVue is safe and effective. "With the CustomVue procedure we can potentially produce better vision than is possible with glasses or contact lenses," claims Dr. Husain.

How? CustomVue uses WaveScan® technology, originally developed for use in high-powered telescopes, to measure the unique imperfections in your vision; imperfections that couldn't be measured before. In fact, WaveScan measurements are 25 times more precise than standard measurements for glasses and contact lenses.

WaveScan produces a sophisticated map of your vision. Like your fingerprint, it's one of a kind. Once your eyes are measured and mapped, your treatment information is transferred to the laser. The CustomVue procedure tailors a distinct correction for each individual. In fact, each treatment is "designed" by the unique characteristics of the individual's eye.

"This provides us with a precise and detailed guide for customizing your laser procedure based on your personal needs," says Dr. Husain.

"When the doctor explained what CustomVue can do, I was really impressed. I finally got a comfort level with laser vision correction."

Diane Marsh, high school teacher

With CustomVue, nearsighted people, even those with astigmatism, can achieve a new level of vision...Personal Best Vision.

Glasses and contact lenses are limited in their ability to personalize their correction. In fact, thousands of individuals have the same glasses prescription. ***"With the CustomVue procedure, we are able to develop a treatment plan tailored just for that person's eyes," claims Dr. Husain.***

What does this mean for you? At ***Associated Ophthalmologists***, you can achieve the full potential of your vision; a level of excellence impossible with glasses or contact lenses.

**The only question is...
What are you waiting for?**

IS CUSTOMVUE™ RIGHT FOR YOU?

Anyone over the age of 21, with nearsightedness or astigmatism may be a candidate for the CustomVue procedure.

Call Dr. S. Ejaz Husain today for a complimentary consultation at 515-244-3937.

Or visit our website for more information.

And what about the results of the FDA clinical studies? At one year after the VISX CustomVue procedure:

- 100% of people could pass a driving test without glasses or contact lenses
- 98% of people could see 20/20 or better without glasses or contact lenses
- 70% of people could see better than 20/20 without glasses or contact lenses

“I figured I would have laser vision correction some day...and when I saw the statistics about CustomVue, I thought, what am I waiting for? Let’s do this!”

Vince Gilpin, firefighter

TOP TEN REASONS TO HAVE THE CUSTOMVUE PROCEDURE WITH DR. EJAZ HUSAIN

1. Dr. Husain has performed thousands of laser vision correction procedures.
2. He is one of the few surgeons, who have completed a two year advanced surgical fellowship in Refractive and Cataract surgery.
3. He is Board Certified Ophthalmologist and a Fellow of the American College of Surgeons.
4. He is very selective in choosing the appropriate candidates and always uses a conservative approach.
5. Dr. Husain carefully reviews all pertinent patient data and plans each patient’s treatment individually.
6. You will personally see Dr. Husain at your screening exam, pre-op diagnostic evaluation and all post op visits.
7. He has one of the lowest enhancement and complication rates in the field.
8. The state of the art technology that he uses has been successfully used to treat over five million eyes worldwide.
9. Associated Ophthalmologists is a long standing reputable practice in Des Moines and Dr. Husain is accessible to his patients.
10. When it comes to your eyes there should be no compromise.
